SUMMARY

B.Tech graduate in Artificial Intelligence and Data Science with hands-on experience in web application development, REST APIs, JavaScript, HTML, CSS, and Git. Familiar with React.js and backend development using Spring Boot, with practical internship experience developing and deploying a serverless web application on AWS. Strong problem-solving and debugging skills with a willingness to learn WordPress, PHP, and CodeIgniter. Seeking a Developer role to contribute to website development and technical projects.

EDUCATION

Bachelor Of Technology (AI&DS) - Artificial Intelligence & Data Science

Graduated at 2026

- Erode Sengunthar Engineering College , Perundurai

CGPA 8.13

TECHNICAL SKILLS

- Programming: Java, Python, JavaScript, HTML5, CSS3.
- Web Development: WordPress, React.js, Website Development, Responsive Web Design.
- WordPress: Theme Customization, Plugin Management, Website Management, Content Management.
- Backend: Spring Boot, Flask, REST APIs.
- Databases: MySQL, PostgreSQL, MongoDB.
- Cloud: AWS S3, Lambda, API Gateway, IAM.
- Tools: Git, GitHub, Postman.
- Core Concepts: CRUD Operations, API Development, JSON, Debugging, Error Handling, Data Structures & Algorithms.

PROJECTS

An Intelligent Machine Learning-Based System for Real-Time Fraud Detection in Online Transactions:

- Built a real-time fraud detection system by integrating a Python-based Machine Learning model with a Java Spring Boot backend.
- Developed a Flask API to enable communication between the ML model and backend for fraud predictions.

Full-Stack E-Commerce Application

- Developed a full-stack e-commerce web application with React.js, JavaScript, HTML, CSS, PostgreSQL, and Prisma, implementing product management and CRUD operations.
- Integrated Razorpay for payments, Cloudinary for image management, Redis for caching, and Nodemailer for email notifications.

Cloud File Storage System

- Developed a web-based file storage application using HTML, CSS, JavaScript, AWS S3, Lambda, and API Gateway.
- Implemented REST APIs and secure file management using AWS IAM.

INTERNSHIP

Cloud Engineering Intern | HEPro AI:

- Developed serverless backend workflows using AWS Lambda and API Gateway.
- Worked with Amazon S3 and IAM for cloud storage, object management, and access permissions.
- Collaborated with team members during development and testing.

CERTIFICATIONS & ACHIEVEMENTS

- Oracle Cloud Infrastructure Foundations Associate
- Led my college team in the District-Level CM Trophy, Erode (2024), securing Third Place with government recognition and a cash prize of ₹25,000.

HACKATHON

- Participated in a 24-hour GenAI Hackathon and developed a chatbot solution.
- Participated in Debugging event in CIT (Coimbatore).
